Fully Automated Chemiluminescence Immunoassay (CLIA) System

Learn more at: www.ystwt.cn

Flexible • Efficient • Reliable

*Developing Scientifically
Focusing on the Health*

Methods

Principle: CLIA with superparamagnetic microbeads
Label: acridinium ester
Substrates: NaOH, H₂O₂

Specifications

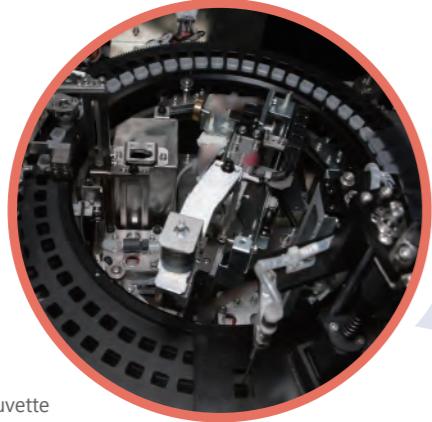

Throughput: up to 200T/h
Results:
 1st result at approx. 29 mins
 Each consecutive result in a 18s interval
Specimen type: serum, plasma
Specimen loading capacity: 100 specimens
Specimen tube dimensions:
 10.5, 13 or 16 mm (diameter)
 75 or 100 mm (height)
Specimen volume: 5~150 µL, CV< 1%
Specimen dilution rate: x10, x100, x200, x1000
On-board reagent capacity: 50 positions
On-board reagent storage: constant 2~8°C
Substrate volume: 100ml , CV< 2%
Incubation temperature: 37±0.5°C
Reaction mode: 1-step, 1.5-step, 2-step

Functions

On-board mixing for microbeads
Touch-screen available
Barcode scanning
Substrate switching automatically: 2 sets of substrate available
LIS connection via com

Others

Size (W*D*H): 1630*1060*1440 (mm)
Weight: approx. 600kg
Tension: 220V, Frequency: 50/60 Hz
Operating temperature: 18~30°C
Power consumption: 400W
Noise: <85 dBA
Pollution Level: 2

**Reaction Rack**

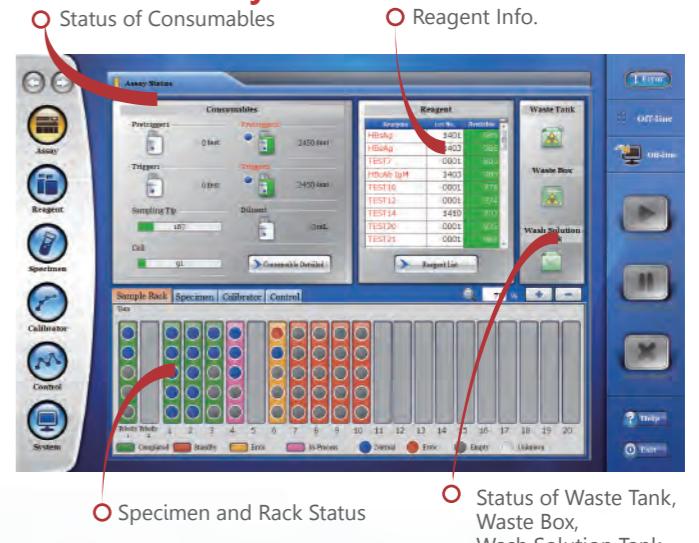

- ▶ 120 reaction positions
- ▶ Blockproof design for cuvette
- ▶ Reaction modes: 1, 1.5, 2-step assay
- ▶ Throughput up to 200 tests/hour
- ▶ First result in 29 mins, each consecutive result in a 18s interval

**Reagents Rack**

- ▶ 50 positions
- ▶ Continuous loading
- ▶ Barcode identification system
- ▶ Multi-loading of one reagent for large-size detection requirement, no need of frequent loading
- ▶ On-board mixing for microbeads

**Sample Rack**

- ▶ 100 on-board samples
- ▶ Continuous loading
- ▶ 10 emergency priority positions
- ▶ Real-time detection
- ▶ Continuous loading

**Interface - Assay Status****Software**

- ▶ Windows system, EN/CN language interfaces, friendly UI design with Touch Screen
- ▶ Automatic analysis of calibration and control
- ▶ Automatic on-board specimen dilution
- ▶ Automatic retesting of gray zone specimens and over-limit specimens
- ▶ LIS-connection

**Consumables**

- ▶ Rack containing up to 960 cuvettes & disposable tips
- ▶ Continuous loading
- ▶ Substrate A & B: 500ml for each
- ▶ Continuous loading, and switching automatically with alarm
